Parentage/Blood Type - AHT No		British Horse Database Number	

ANY HORSE/PONY CAN BE REGISTERED WITH THE SSH

I understand that since 01.07.00 by (EU) law, every horse (pony, donkey and mule) must have a passport. If your horse already has a passport and you wish it to be registered with the SSH, please complete the full breed society application form. I understand that it is illegal to obtain a second passport for my horse.

I confirm that the above details are accurate, and the horse does not already have a passport and that this application is for an initial basic passport.

I enclose my cheque made payable to Scottish Sports Horse to the Value of £

The recommended procedure for identification is described in the FEI booklet "Identification of Horses". The diagram and written description must agree and be sufficiently detailed to ensure the positive identification of the animal in future. White markings must be shown in RED and the written description completed using BLACK ink. If there are no markings this must be stated in the written description. All head and neck whorls must be marked "X" and described in detail. Other whorls should be similarly recorded in greys and animals lacking sufficient other distinguishing marks. Acquired marks (brands, scars) and other distinguishing marks (wall eyes) should always be noted.

This page is not applicable for over stamping of existing passports, except where they do not contain an identification sketch. With the expressed authority of the owner, an existing vaccination certificate can, sometimes, be used for passport purposes.
